Digital Logistic  
Services

# décar bonize

your  
supply chain  
and logistics

The **Digital Logistics Services ecosystem** offers better yard management and decarbonization at the same time. With us, you will successfully roll out your digital transformation.

## A SMALLER TRANSPORT CARBON FOOTPRINT.

Our solution knocks 22 minutes\* off vehicle time at the yard by offering fast check-ins, real-time calls, automated gate-in gate-out management and optimized loading. And that means big energy savings for your carriers.

**With Digital Logistic Services, you cut up to 1.5% transport carbon emissions.**

\*Based on results in 2021 for a logistics warehouse receiving 200 trucks per day

## AUTOMATED MANAGEMENT OF YOUR TRANSPORT ENERGY TRANSITION.

Automatic number plate checks on in-bound vehicles at your site allows us to give you their motor type\* in real-time.

**With Digital Logistic Services data analysis software, you can monitor motor types and set out how to cut your carbon emissions faster with your partners.**

\*Eclimatic database - Al Cargo Foundation.

## BETTER WORKING CONDITIONS FOR LOADING STAFF AND DRIVERS.

The DLS solution improves information exchange among the entire workforce and provides a predictive vision of tasking. This in turn improves the working conditions of loading staff. **And drivers are less stressed as wait times are reduced, information is received in real-time and in multiple languages used.** It also means safer trips and fewer trips in bad weather.

## SMALLER DIGITAL CARBON FOOTPRINT.

Digital Logistic Services is committed to minimizing its digital carbon footprint in different ways: data is managed in a France-based and low carbon cloud (Titan DC), and reconditioned sensors and kiosks can be used if requested.
